Yoshida, M. *see* **Kokaze, A.**
Yu, M. W. *see* **Chang, H. C.**

Zietz, B., Wiese, J., Brengelmann, F. and Dunkelberg, H. Presence of *Legionellaceae* in warm water supplies and typing of strains by polymerase chain reaction, 147

Epidemiol. Infect. (2001), **126**, 471–472. Printed in the United Kingdom © Cambridge University Press

Index of Subjects

African swine fever virus, isolation of a non-haemadsorbing, non-cytopathic strain of, in Madagascar, 453
Avian cellulitis, selection bias in epidemiological studies of infectious disease using *Escherichia coli* and, as an example, 139

***Bartonella* species,** longitudinal monitoring of the dynamics of infections due to, in UK woodland rodents, 323
***B. pertussis*,** the seroepidemiology of, infection in Catalonia, Spain, 205

Chickenpox, the magnitude of variation in temperature within a year has an effect on the seasonal variations of, incidence in Japan, 269
Cryptosporidiosis, a statewide outbreak of, in New South Wales associated with swimming at public pools, 389
***Cryptosporidium*,** paired city, serosurvey in the southwest USA, 301

Diphtheria, the prevalence of, immunity in healthy population in Poland, 225

Echovirus 11, an outbreak of, in a children's home, 441
***E. coli* O157,** an outbreak of, infection with evidence of spread from animals to man through contamination of a private water supply, 135
Enterococci, detection and typing of vancomycin-resistance genes of, from clinical and nosocomial surveillance specimens by multiplex PCR, 357
***Enterococcus avium*,** distribution of aminoglycoside resistance genes in recent clinical isolates of *Enterococcus faecalis*, *Enterococcus faecium* and, 197
***Enterococcus faecalis*,** distribution of aminoglycoside resistance genes in recent clinical isolates of, *Enterococcus faecium* and *Enterococcus avium*, 197
***Enterococcus faecium*,** distribution of aminoglycoside resistance genes in recent clinical isolates of *Enterococcus faecalis*, and *Enterococcus avium*, 197
***Escherichia coli* O157,** epidemiological investigation of the Central Scotland outbreak of, infection, November to December 1996, 335
***Escherichia coli* O157,** survival of Shiga toxin-producing, in marine water and frequent detection of the Shiga toxin gene in marine water samples from an estuary port, 129
***Escherichia coli*,** P fimbriae and aerobactin as intestinal colonization factors for, in Pakistani infants, 19
***Escherichia coli*,** P fimbriae, capsule and aerobactin characterize colonic resident, 11
***Escherichia coli*,** selection bias in epidemiological studies of infectious disease using, and avian cellulitis as an example, 139
***Escherichia coli*,** the prevalence and characterization of verotoxin-producing, isolated from cattle and pigs in an abattoir in Hong Kong, 173

Faecal coliform, comparison of methods to analyse, count data from environmental samples, 181

***Haemophilus influenzae* type b,** the effectiveness of, conjugate vaccines in a high risk population measured using immunization register data, 31
Heliobacter, decreasing prevalence of, antibodies in Finland, with reference to the decreasing incidence of gastric cancer, 37
Hepatitis B, prevalence of, infection markers in Lebanese children: the need for an expanded programme on immunization, 285
Hepatitis C, prevalence of antibodies to, virus, HIV and human T-cell leukaemia/lymphona viruses in injecting drug users in Tayside, Scotland, 1993–7, 97
Hepatitis C, risk factors associated with, virus infection in Taiwanese government employees, 291
Hepatitis, death rates and causes of death in cohorts of serum, patients followed up for more than 20 years, 89
HIV, prevalence of antibodies to hepatitis C virus, and human T-cell leukaemia/lymphoma viruses in injecting drug users in Tayside, Scotland, 1993–7, 97
***H. pylori*,** validation of the saliva-based, test, HeliSAL™ and its use in prevalence surveys, 191
Human T-cell leukaemia/lymphoma, prevalence of antibodies to hepatitis C virus, HIV and, viruses in injecting drug users in Tayside, Scotland, 1993–7, 97

Influenza, excess hospital admissions for pneumonia and, in persons ⩾ 65 years associated with influenza epidemics in three English health districts: 1987–95, 71
Influenza, prognostic factors for, -associated hospitalization and death during an epidemic, 261

Japanese encephalitis, analysis of, epidemic in western Nepal in 1997, 81

***Legionellaceae*,** presence of, in warm water supplies and typing of strains by polymerase chain reaction, 147
***Legionella pneumophila*,** different growth rates in amoeba of genotypically related environmental and clinical, strains isolated from a thermal spa, 231
Leprosy, environmental mycobacteria in northern Malawi: implications for the epidemiology of tuberculosis and, 379
Lumpy skin disease virus, mechanical transmission of, by *Aedes aegypti* (Diptera: Culicidae), 317

Measles, the seroepidemiology of, in Western Europe, 249

Meningococcal, risk factors for, disease in university halls of residence, 211
Mycobacteria, environmental, in northern Malawi: implications for the epidemiology of tuberculosis and leprosy, 379
Mycoses, emerging trends in the epidemiology of invasive, in England and Wales (1990–9), 397

Neisseria gonorrhoeae, a large outbreak of conjunctivitis caused by a single genotype of, distinct from those causing genital tract infections, 373
Neisseria gonorrhoeae, investigation of an outbreak of ciprofloxacin-resistant, using a simplified opa-typing method, 219
Norwalk virus, outbreak of, in a Caribbean island resort: application of molecular diagnosis to ascertain the vehicle of infection, 425

Paracoccidioidomycosis in Columbia: an ecological study, 309
Parapoxvirus, serological survey of, infection in wild ruminants in Japan in 1996–9, 153
Pontiac fever, a whirlpool associated of, at a hotel in Northern Sweden, 241
Poststreptococcal glomerulonephritis, acute: public health implications of recent clusters in New South Wales and epidemiology of hospital admissions, 365
Pseudorabies, an analysis of a presumed major outbreak of, virus in a vaccinated sow herd, 119

Rotavirus, a study of infectious intestinal disease in England: risk factors associated with group A, in children, 63

Salmonella, environmental survey of, and comparison of genotypic character with human isolates in Western Japan, 159
***Salmonella* Typhimurium,** epidemiological studies of human and animal, DT104 and DT104b isolates in Ireland, 3
Staphylococcus aureus, genotypic analysis of, from milk of dairy cows with mastitis in Argentina, 445
Staphylococcus aureus, methicillin-resistant, (MRSA): a community-based prevalence survey, 351
Streptococcus pneumoniae, molecular epidemiology of multiple drug resistant type 6B, in the Northern Territory and Queensland, Australia, 25

Trichomoniasis, enzyme immunoassay for urogenital, as a marker of unsafe sexual behaviour, 103
Trypanosoma evansi in Indonesian buffaloes: evaluation of simple models of natural immunity to infection, 111
Tuberculosis, environmental mycobacteria in northern Malawi: implications for the epidemiology of, and leprosy, 379
Tuberculosis, the effect of age and study duration on the relationship between 'clustering' of DNA fingerprint patterns and the proportion of, disease attributable to recent transmission, 43

Vancomycin-resistance, detection and typing of, genes of enterococci from clinical and nosocomial surveillance specimens by multiplex PCR, 357
Varicella, epidemiology of, in Slovenia over a 20-year period (1979–98), 279
Varicella, the seroepidemiology of, in Italy, 433
Viral outbreak, comparative utility of restriction fragment length polymorphism analysis and gene sequencing to the molecular epidemiological investigation of a, 415
